

# YOU HAVE CHALLENGES. WE HAVE SOLUTIONS.

For contractors, property managers, and owners alike, multifamily home construction and renovation is fraught with challenges. From a cabinetry standpoint, you need to keep costs down while at the same time installing stylish products with broad appeal and long term quality. What looks good today must look good years from now.

As owners, operators, and property managers ourselves, we get it. And everything we do is geared towards solving the challenges we experienced firsthand. Our focus on larger projects and our ability to work on multiple jobs at once affords us economies of scale, which we pass on to you in the form of significant cost savings.

As for the cabinetry itself, you'll be hard pressed to find higher quality construction or more attention to detail. Details that enable our products to stand up to everything life throws at them, cut install time, and ensure long-lasting style. From soft close mechanisms to proprietary adjustable legs to available PVC-based covering that resists chips, scratches and chemicals, and repels water as expertly as a duck's back. Considering water damage causes over \$13 billion\* in losses annually, water-resistant cabinetry is guaranteed to add value to your property and longevity to your project.

This brochure will give you a good idea of the impeccable workmanship and strategic thinking inherent in Cabinet Brothers cabinetry. But to really appreciate it, you need to see it for yourself. And to do that, just give us a call.

## 25 YEARS. THOUSANDS OF MULTIFAMILY JOBS.

### That's how you build a reputation.

You learn a lot in 25 years. Especially when you focus on large multifamily properties. The importance of quality service, for example. And how to compress the build-to-ship timeline. Then there are all the benefits of strategic planning and the savings that come with large scale production and delivery.

You also learn that innovative products have a truly timeless appeal and that there's no substitute for **attention-to-detail and pride-filled workmanship.**

And when you build all of this experience into a cabinet line that's only available to those in multifamily real estate, you leave your competitors in the sawdust.

# WHAT MAKES OUR CABINETS THE BEST?

- ✓ Efficient build and delivery timelines
- ✓ Optional Features: 3/4" optional plywood dowel construction, full-extension dovetail drawers, and additional color choices
- ✓ Available, durable PVC based covering that resists chips, scratches, and chemicals
- ✓ Attention to detail gets your project right the first time
- ✓ Full access frameless construction maximizes space and allows for easy inspections and cleaning
- ✓ Made in the USA
- ✓ Soft close mechanisms on doors and drawers are completely silent and slam-resistant to reduce wear over time
- ✓ Unique waterproof protection for the base cabinets as they sit 4" away from touching the ground

## FEATURES

### 1 | DRAWERS

Soft-close drawers with single wall metabox for simple installation and removal.

### 2 | CONSTRUCTION

5/8" backing keeps cabinets square during shipping and allows for easy installation by fastening anywhere in the interior of the cabinet.

### 3 | INTERIOR

White foil interior with matching edge banding, to resist stains and scratches.

### 4 | LEGS

Adjustable 800lb capacity legs make this cabinet resistant to water damage while allowing for easy leveling and quicker installation.

### 5 | DOORS

Shaker or slab door and drawer front options in a variety of finishes, including our optional, durable PVC finish.

### 6 | SHELVES

Adjustable, 3/4" thick storage shelves.

### 7 | HINGES

Concealed, soft-close hinges are six-way adjustable with 105° access.

### 8 | TOE KICK

Waterproof toe kick with adjustable clips and flexible wiper floor seal for easy removal and cleaning.
